A. TITLE OF PROJECT: Campbell Hall and North Hall Waterless Urinal Project.

B. PREPARER’S NAMES: Ken Hermann and Ron Yamane.

C. RESPONSIBLE DEPARTMENT: Physical Facilities.

D. BRIEF SUMMARY OF PROJECT: With the support of a $10,242.00 grant from The Green Initiative Fund, Campbell Hall and North Hall have nine new waterless urinals installed. Every use of the waterless urinals saves approximately 1.5 to 3 gallons of water. Reference the two attachments for the costs, savings, and benefits.

E. RATING OF THE PROJECT SUCCESS: Each waterless urinal saves 20,000 to 50,000 gallons of water per year. This project, like the others contribute to water conservation as well as obtaining LEED Credits. Water conservation is incredibly important as California is essentially a desert. In addition sewage costs are reduced.

F. ANY PITFALLS ENCOUNTERED: None.

H. BRIEF SUMMARY OF OVERALL EXPERIENCE: The project has been a success and we intend to install additional waterless urinals outside of TGIF. We appreciated the support from TGIF and we are all proud of providing a superior product that is environmentally friendly and economical.
